Integrated EPC Delivery

Engineering · Procurement · Construction · Commissioning · Handover · Operations & Maintenance

02

Built on Experience. Focused on Energy.

Who We Are

MASCO Energy is a Saudi EPC and industrial infrastructure company delivering integrated solutions across energy, oil and gas, petrochemicals, utilities, mining and strategic infrastructure.

Evolving from MASCO's established contracting business, formerly known as MASCO General Contracting, the company brings decades of infrastructure and construction experience into a focused energy platform with capabilities spanning engineering, procurement, construction, commissioning and operational support.

Today, MASCO Energy delivers complex projects across the Kingdom while expanding specialized capabilities in pipeline and digital infrastructure solutions. Supported by the wider strength of MASCO Group, the company combines local market knowledge, multidisciplinary expertise and large-scale execution capability to support Saudi Arabia's continued industrial and energy development.

03

CEO Message

Eng. Omar M. Algethaan

Chief Executive Officer

MASCO Energy is entering a new chapter built on a strong foundation of contracting experience, technical capability and proven project execution across Saudi Arabia.

As the Kingdom continues to advance its energy and industrial ambitions, our role is evolving with it.

We are strengthening our integrated EPC capabilities, expanding into specialized areas of the energy value chain, and building the partnerships and expertise required to support increasingly complex projects.

Our focus remains clear: deliver safely, execute with discipline, and create lasting value for our clients. This approach is supported by our people, our project capabilities, and the broader strength and heritage of MASCO Group.

Looking ahead, we will continue investing in national talent, specialized capabilities, technology and strategic partnerships while maintaining the quality and reliability expected by our clients and stakeholders.

Our ambition is not simply to grow, but to build a stronger and more capable Saudi energy company that contributes meaningfully to the Kingdom's industrial development.

04

From Infrastructure Heritage to Energy Expertise

Our Heritage

As Saudi Arabia's industrial and energy landscape evolved, so did the business. MASCO's contracting capabilities expanded into increasingly complex energy and industrial projects, ultimately leading to the evolution of the contracting business into MASCO Energy.

Today, that heritage provides MASCO MASCO Energy's story is rooted in the contracting and infrastructure experience built by MASCO over decades of development in Saudi Arabia.

What began with road construction, transportation and infrastructure expanded over time into water projects, major highways, railway infrastructure, industrial developments and large-scale projects for significant clients in the Kingdom.

Energy with a strong foundation for its next stage of growth — combining established construction capability with integrated EPC delivery and specialized energy solutions.

FOUNDATION

Roads, transportation and construction

INFRASTRUCTURE EXPANSION

Highways, water and major civil works

NATIONAL MEGA-PROJECTS

Railways and strategic infrastructure

MASCO ENERGY

Integrated EPC and specialized energy solutions

INDUSTRIAL & ENERGY EXPANSION

Major industrial developments and energy projects

05

Backed by a Broader Legacy

Part of MASCO Group

MASCO Energy is part of MASCO Group, a diversified Saudi business with a long-standing presence across contracting, infrastructure, industry, real estate and related sectors.

This wider foundation provides MASCO Energy with access to established resources, multidisciplinary expertise, market knowledge and organizational depth that strengthen its ability to mobilize and execute complex projects.

Resource Depth

Access to technical, operational and project resources supporting large-scale mobilization.

Integrated Expertise

A broader ecosystem of complementary capabilities and industry experience.

Execution Capacity

Organizational depth supporting simultaneous projects across multiple locations.

Financial Strength

Established institutional and financial foundations supporting long-term project delivery.

Saudi Market Experience

Decades of accumulated experience across the Kingdom's infrastructure and construction landscape.

Vision, Mission & Values

Vision

To be a trusted Saudi partner for integrated energy and industrial solutions, enabling the Kingdom's continued growth and transformation.

Mission

To deliver safe, reliable and integrated EPC solutions through technical expertise, disciplined execution, strong partnerships, and continuous development of our people and capabilities.

Our Values

Integrity
We act transparently, ethically and responsibly in every commitment.

Safety
We protect our people, partners, communities and assets through disciplined safety practices.

Quality
We maintain rigorous standards across every stage of project delivery.

Accountability
We take ownership of our decisions, commitments and performance.

Partnership
We build lasting relationships through collaboration, trust and shared success.

Innovation
We continuously improve how we engineer, execute and deliver.

07

Expertise Across Saudi Arabia's Critical Industries

Markets We Serve

Oil & Gas
Integrated engineering, construction, utility and infrastructure solutions supporting upstream and downstream developments.

Power & Energy
Power generation, transmission, distribution, substations and associated energy infrastructure.

Utilities
Water, power, drainage and utility networks supporting industrial facilities and major developments.

Petrochemicals
Industrial facilities, infrastructure, utilities and associated systems for complex petrochemical developments.

Mining & Industrial
Civil, structural, utility and supporting infrastructure for mining, processing, manufacturing and industrial facilities.

Strategic Infrastructure
Complex infrastructure supporting giga-projects, industrial zones, transportation networks and national developments.

08

One Integrated Approach. From Concept to Operation.

Integrated EPC Delivery

01

Engineering

Concept development, detailed engineering, constructability, multidisciplinary coordination and technical support.

02

Procurement

Strategic sourcing, vendor management, logistics, material compliance and supply-chain coordination.

03

Construction

Civil, structural, industrial, MEP and infrastructure execution supported by disciplined site management.

04

Commissioning

Testing, system verification, performance validation and operational readiness.

05

Handover

Documentation, final acceptance, system turnover and coordinated project closeout.

06

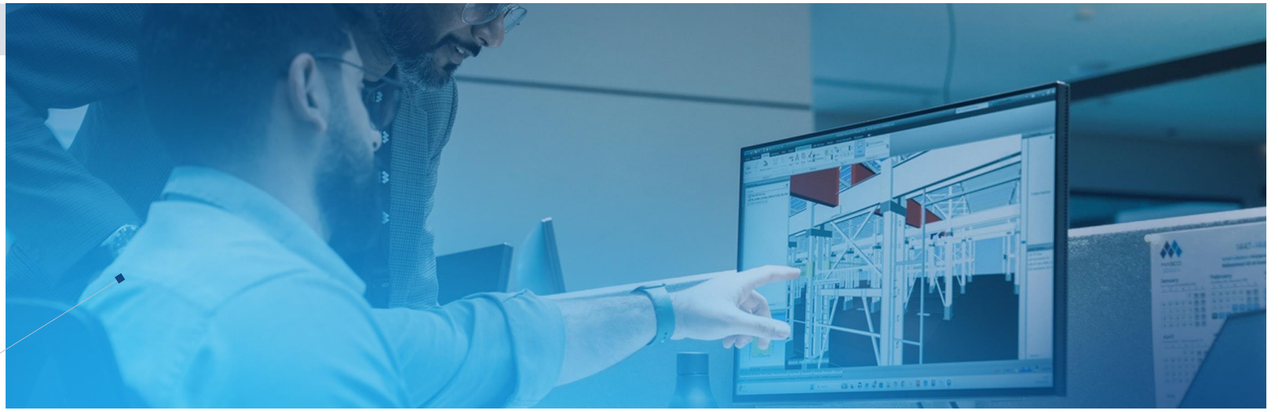

Operations & Maintenance

Preventive and corrective maintenance, performance support and lifecycle asset services.

Engineering for Execution

Engineering

MASCO Energy's engineering capabilities support projects from early technical development through detailed design and site execution, with a focus on constructability, multidisciplinary coordination, compliance and operational requirements.

Front-End & Detailed Engineering

- Conceptual and multidisciplinary engineering.
- Detailed design development.
- Constructability reviews.
- Value engineering.
- Site and facility layouts.
- Technical calculations and studies.

Civil & Structural Engineering

- Geotechnical and foundation solutions.
- Structural design.
- Earthworks and site development.
- Underground infrastructure.
- Drainage and utility networks.
- Structural coordination.

MEP & Utility Engineering

- Electrical systems.
- HVAC.
- Industrial piping.
- Fire protection systems.
- Water and utility networks.
- Automation and control integration.

Digital Engineering

- Building Information Modeling (BIM).
- Design coordination.
- Clash detection.
- Integrated technical documentation.

Strategic Procurement & Supply Chain

MASCO Energy supports project delivery through coordinated procurement, supplier management, logistics and material-control processes designed around project specifications, schedules, quality requirements and site needs.

Strategic Sourcing

Project materials, equipment and specialized packages sourced through qualified local and international suppliers.

Vendor Management

Supplier prequalification, technical coordination, documentation, quality requirements and delivery monitoring.

Equipment & Material Procurement

Structural materials, piping and valves, electrical systems, MEP equipment, machinery and specialized project packages.

Logistics & Material Control

Freight coordination, customs clearance, transportation, warehousing, traceability, receiving inspection and site-delivery planning.

Quality Compliance

Vendor documentation, inspections, certifications, FAT requirements and material compliance before site integration.

Built for Complex Project Environments

Construction

MASCO Energy executes multidisciplinary construction works across energy, industrial and infrastructure developments, supported by coordinated site management, technical supervision, quality control, HSE, logistics and project controls.

Civil & Infrastructure

- Earthworks and site development.
- Foundations and reinforced concrete.
- Underground utilities.
- Roads and industrial access networks.
- Drainage and water infrastructure.
- Site preparation and grading.

Structural Works

- Structural steel erection.
- Concrete structures.
- Pre-engineered buildings.
- Industrial foundations.
- Heavy structural systems.

MEP Installation

- Mechanical systems.
- Electrical systems.
- HVAC.
- Plumbing and utility networks.
- Fire protection systems.
- Industrial piping.

Site Execution & Technical Support

- Mobilization and logistics.
- Construction planning.
- Engineering support.
- Interface coordination.
- Quality control.
- HSE implementation.

From Construction Completion to Operational Readiness

Commissioning, Handover & O&M

Pre-Commissioning

System inspections, testing preparation, checklists, isolation requirements and readiness verification.

Testing & Commissioning

Testing and validation of mechanical, electrical, utility and control systems against approved project requirements.

System Integration

Verification of interfaces between individual systems to support coordinated facility operation.

Handover & Documentation

Final inspections, technical documentation, as-built records, acceptance coordination and structured system turnover.

Operations & Maintenance

Preventive and corrective maintenance, asset-performance support, inspections, troubleshooting and ongoing technical services.

Delivering Across the Kingdom

Project Footprint

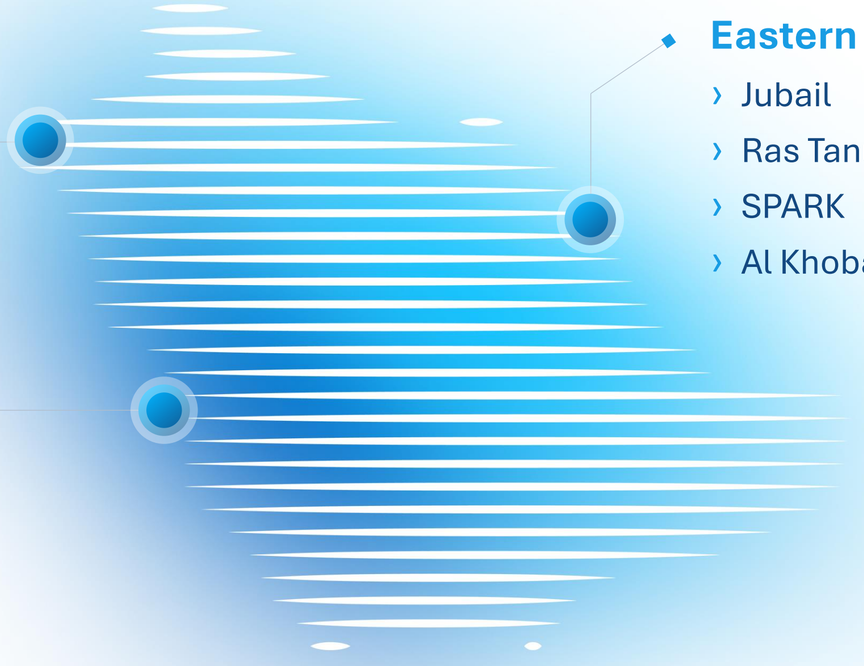

MASCO Energy's project portfolio spans major energy, industrial, utility and infrastructure developments across Saudi Arabia, reflecting the company's ability to mobilize multidisciplinary teams and execute in complex operating environments.

Energy & Petrochemical Projects

AMIRAL — Package 6

Location
Jubail, Saudi Arabia

Sector:
Petrochemicals / Industrial

MASCO Role:
EPC package delivery

Status: **Ongoing**

MASCO Energy supports the AMIRAL development through multidisciplinary project execution. The project is a strong case study for the profile because it can demonstrate current energy-sector delivery and quality-management performance.

Ras Tanura Project

Location
Ras Tanura, Saudi Arabia

Sector:
Energy / Oil & Gas

Current approved description: Energy infrastructure project within MASCO Energy's portfolio.

Industrial & Utility Infrastructure

MSSD — SPARK

Location
King Salman Energy Park (SPARK), Eastern Province, Saudi Arabia

Sector:
Industrial / Energy Infrastructure

MASCO Energy supports industrial development within one of Saudi Arabia's key energy ecosystems through multidisciplinary construction and project execution.

Project Highlight:
99.09% waste diversion reported through controlled segregation and recovery practices.

MSSD — Jeddah

Location
Jeddah, Saudi Arabia

Sector:
Industrial Infrastructure

Current approved description: Construction and infrastructure project within MASCO Energy's portfolio.

Supporting Saudi Arabia's Strategic Developments

Strategic Infrastructure

Infrastructure works supporting one of the Kingdom's most significant strategic developments, incorporating civil works, site development, utility infrastructure and associated project execution.

MASCO's broader contracting heritage includes railway infrastructure delivery and associated civil works. This experience forms part of the execution foundation behind MASCO Energy today.

- **Track engineering**
- **Rail laying**
- **Signaling systems**
- **Infrastructure foundations**

Selected Project Experience

Project / Development	Location	Sector	Capability
AMIRAL Package 6	Jubail	Petrochemicals	EPC / Industrial
MSSD — SPARK	Eastern Province	Industrial / Energy	Construction & Infrastructure
MSSD — Jeddah	Jeddah	Industrial	Construction & Infrastructure
Ras Tanura	Eastern Province	Oil & Gas / Energy	Project Delivery
NEOM Infrastructure	Northwestern KSA	Strategic Infrastructure	Civil & Infrastructure
Railway Infrastructure	Saudi Arabia	Transportation	Heritage / Major Infrastructure

MASCO Pipelines

Specialized Pipeline Expertise

MASCO Pipelines is a joint venture between MASCO Energy and CIS Gaz Arabia, established to deliver specialized pipeline solutions for Saudi Arabia's energy and industrial sectors.

The venture combines MASCO Energy's Saudi execution platform, market experience and infrastructure capabilities with CIS Gaz Arabia's specialized international pipeline engineering and construction track record.

Pipeline EPCC

- Oil & gas transmission pipelines.
- Collection & distribution networks.
- Compression & pumping stations.
- Metering & pressure-regulating stations.

Specialized Construction

- Pipeline laying & welding.
- HDD & trenchless crossings.
- Tie-ins.
- Testing & commissioning.

Operations & Maintenance

- Pipeline integrity management.
- Preventive & corrective maintenance.
- Inspection & condition monitoring.
- Asset lifecycle support.

Combined Partner Credentials

+1,500 km
Pipelines constructed

+35 Years
CIS Gaz pipeline experience

Lumeron

Extending MASCO Energy into Digital Infrastructure

Lumeron is owned by MASCO Energy and forms part of its specialized business portfolio, extending the company's capabilities into digital infrastructure and technology solutions supporting modern industrial and infrastructure environments.

Through Lumeron, MASCO Energy can complement physical project delivery with digital systems and connectivity capabilities that support increasingly connected and technology-enabled facilities.

Capability Areas Requiring Final Lumeron Validation

- **Digital infrastructure**
- **Connectivity and fiber solutions**
- **Systems integration**
- **Control and intelligent systems**
- **Data and technology environments**

Safety and Quality by Design

HSE & Quality

Safety and quality are integrated into MASCO Energy's project-delivery processes, from planning and mobilization through construction, commissioning and handover.

Structured HSE and quality systems support consistent execution, regulatory compliance, workforce protection and continuous improvement across project operations.

10M+ LTI-Free Man-Hours

A significant safety-performance milestone reported across the project portfolio.

Quality in Execution

Quality assurance and control across engineering, procurement, construction, inspection, testing, documentation and handover.

Continuous Improvement

Audits, inspections, technical training, quality walkthroughs, lessons learned and performance monitoring.

Building National Capability

People & Localization

MASCO Energy recognizes that long-term growth depends on developing people and strengthening local capability.

The company supports Saudi Arabia's localization objectives through national talent development, local procurement, structured learning, technical training and knowledge transfer across its operations.

National Talent Development

- Developing Saudi engineers, specialists, project professionals and future leaders through practical experience and structured career development.

Learning & Development

- On-the-Job Training.
- Cooperative Training.
- Tamheer.
- Technical apprenticeship.
- Professional certification.
- Individual Development Plans.
- Continuous learning.

Local Supply Chain

- Supporting qualified Saudi manufacturers, suppliers and subcontractors where appropriate.

Knowledge Transfer

- Project exposure, technical mentoring, professional development and specialized training supporting long-term national capability.

Responsible Project Delivery

Sustainability

MASCO Energy integrates environmental considerations into project operations through resource management, waste reduction, water stewardship, energy monitoring and responsible site practices.

99.09% Waste Diversion

Reported at MSSD/SPARK through waste segregation and recovery practices.

100% Treated Wastewater Recycled

On-site recycling supporting zero-discharge practices within the referenced project.

Energy & Carbon Monitoring

Project-level monitoring of energy consumption and carbon emissions.

Renewable Energy Integration

Renewable energy applications incorporated within relevant project environments where applicable.

Disciplined Delivery. Clear Accountability.

Governance & Delivery Assurance

MASCO Energy's project-governance approach connects leadership, project teams, technical functions and support departments through defined responsibilities, structured controls and performance monitoring.

Operational Discipline

Standardized processes and defined procedures supporting consistency across project execution.

Risk Management

Project risks identified, assessed, monitored and addressed through structured controls and mitigation planning.

Cross-Functional Coordination

Engineering, procurement, construction, quality, HSE and project controls aligned through coordinated workflows.

Performance Monitoring

Regular reporting and performance evaluation supporting informed decisions and timely management intervention.

Backed for Scale

Strength Behind Delivery

Complex EPC projects require more than technical expertise. They require organizational capacity, financial stability, access to resources and the ability to sustain execution throughout long project lifecycles.

As part of MASCO Group, MASCO Energy benefits from a broader corporate foundation that supports project mobilization, operational continuity and long-term growth.

Established Saudi Heritage

Decades of experience across construction, infrastructure and major developments.

Broad Resource Base

Access to complementary expertise and organizational resources across the wider Group.

Financial Capacity

Established financial relationships and institutional foundations supporting large-scale project execution.

Long-Term Perspective

A Saudi business platform built around sustained participation in the Kingdom's development.

Advancing with Saudi Arabia's Energy Future

Looking Ahead

MASCO Energy is continuing its evolution from established contracting and infrastructure capability toward a more specialized, integrated energy platform.

The company's next stage of development is focused on strengthening core EPC capabilities, expanding specialized solutions, developing national talent and building strategic partnerships that support increasingly complex energy and industrial projects.

Through its core operations and specialized businesses, MASCO Energy aims to broaden its contribution across the energy value chain while maintaining the execution discipline, local knowledge and project capability built through its contracting heritage.

Strengthen

Integrated EPC capability across priority energy and industrial markets.

Specialize

Expand pipeline and digital capabilities through focused business platforms.

Localize

Continue investing in Saudi talent, suppliers and technical capability.

Innovate

Apply technology and improved delivery methods where they create measurable project value.

Grow

Build on the company's Saudi foundation to pursue selective opportunities in strategic markets.
